

Watercolor Resist Dye Class

Thanks for joining our class and learning a fun new way to work with water color paints! In this class, we will use masking fluid as a way to resist dye on watercolor paper and talk about different ways we can make our watercolor paints stand out. Whether you use this for wall art or to make stationary, every piece will be totally unique!

Supplies provided:

- 3 sheets of 140lb watercolor paper
- 1 set of watercolors with brush
- 1 sponge brush
- A flat brush and a thin brush
- 1 ramekin of masking fluid
- 1 small rubber eraser

Supplies needed by participant:

- 1 cup of water for cleaning paint off brushes
- 1 cup of water for the sponge brush
- 1 cup of warm soapy water for cleaning off the brush you use masking fluid on
- Smock/apron
- Newspaper/something to put water color paper on top of while painting
- A salt shaker
- Wet paper towels or baby wipes

*** While watercolor paint wipes off of skin with warm soapy water, it will adhere to cloth and is very tough to get out. Its best to put either a plastic table cloth, wrapping paper or newspapers down under your canvas to prevent paint from getting anywhere. Soap and water are the best way to wash it out of surfaces it doesn't stain (such as your hands and the supplies you use to create your masterpiece with.)
